1988-2018

FROM START-UP TO MARKET LEADER IN POLYURETHANE

IGK INSULATING GLASS SEALANTS

QUALITY - SERVICE - INNOVATION

On the road to success for 30 years

"IGK was founded in 1988 with the aim of using the superior qualities of polyurethane for the double-glazing industry."

"The driving force behind our growth is our mercury-free polyurethane, developed in 2001, with which we have been market leaders since 2012."

"Today we are manufacturing a complete range of secondary and primary sealants and service products to fulfil all customer wishes."

Frithjof Funck, Director of Marketing and Sales
Dr. Randolf Karrer, Director of Technology

Quality – signed, sealed and delivered
IGK manufactures its products in Germany and is certified in accordance with DIN EN ISO 9001 and DIN EN ISO 14001. Needless to say, all products correspond to the requirements of DIN EN 1279 and the remaining relevant standards for double glazing in Europe. With continuous internal and external quality control, we are ensuring that you can rely on our products from beginning to end.

Service – with heart and soul plus expertise
As a medium-sized company, we know each of our customers personally. With our streamlined structure and quick decision-making processes, we can react to your queries and requests quickly, flexibly, and authoritatively. We know how important it is that production keeps going. And our experienced application engineers know what needs to be done to achieve that.
NB: our customers can now download product sheets directly from the customer area of our redesigned website!

Innovation – with experience and an entrepreneurial spirit
IGK had already put its first mercury-free polyurethane on the market in 2001 – long before the ban on the use of catalysts containing mercury in force since 2017.
We are the only manufacturer to offer a thermoplastic spacer (TPS®) which can be combined with polysulphides just like with polyurethane. In the future we'll also develop new solutions in close collaboration with our customers, suppliers, and machine manufacturers with which we can give our customers an advantage in the market

Global presence
Our clients can find competent contacts on site in our offices in numerous countries within and outside of Europe. We serve the important North American market with a subsidiary based in Chicago. Other subsidiaries are being planned world-wide. We are continuously investing in increasing our quality, productivity, and capacity so that we can continue to serve our customers reliably and with the highest quality in the future.

Here's to the next thirty years!

A SECONDARY SEALANT

IGK 130
2c Polyurethane Secondary Sealant
without mercury

IGK 311/330
2c Polysulfide Secondary Sealant

IGK 711
1K Hotmelt

B PRIMARY SEALANT

IGK 511
Butyl Primary Sealant

IGK 511 S
Butyl Primary Sealant
for foam spacers

C SPACER BARS

IGK 611
TPS Thermoplastic Spacer Bar®

IGK 611 FH

SERVICE PRODUCTS

IGK 911 Rinsing agent for sealant mixers
IGK 918 Plasticiser
IGK 921 Thermic cleaner for mixers
IGK 930 Hand washing paste
IGK 955 Desiccant beads
with colour indicator
IGK 961 Lubricant for Hotmelt and TPS
melting equipment
IGK 980 Adhesion tester
